SKILLS

Languages:	C++, CSS, JavaScript, Python, Java, PHP
Libraries:	React, Tailwind CSS, ExpressJS
Tools/Platforms:	Node, Git, GitHub, MySQL, Google Colab, VS Code, MongoDB
Coursework:	Data Structures & Algorithms, Computer Networks,
Soft Skills:	Adaptability, Problem Solving, Time Management, Decision-Making.

PROJECTS

Training Center Management MERN Stack GITHUB	Dec' 25
- Developed a full-stack training management platform using the MERN stack, enabling user authentication, skill-based course browsing, enrollment, progress tracking, and certification management. - Implemented role-based access control with secure admin-side CRUD operations to efficiently manage users, training content, assessments, and course offerings. - Designed RESTful APIs and optimized MongoDB schema for structured data handling, improving system performance and reducing data retrieval time by 30% during testing.	
App-Recommendation System HTML, CSS, JavaScript GITHUB	Apr' 25
- Created a conversational app-recommendation web application using HTML, CSS, and Vanilla JavaScript, featuring intelligent category detection through keyword mapping and dynamic follow-up questioning. - Executed end-to-end user interaction flow including login, guest access, signup validation, typing indicators, character counters, and contextual chatbot responses for a seamless user experience. - Built a mock API-driven recommendation engine that generates platform-specific app suggestions with detailed descriptions, download buttons, and multi-category support across productivity, fitness, news, entertainment, and more.	
Eco Recycle E-waste Management System JavaScript, PHP, MySQL GITHUB	Mar' 25
- Engineered the core backend logic in PHP, implementing user authentication, form handling, and persistent data storage with prepared statements for secure DBMS interactions. - Produced a key feature for e-waste tracking and valuation, which calculates and manages precious metal values for different electronic devices. - Crafted and implemented the responsive front-end using HTML, JavaScript, and Tailwind CSS, featuring pages for facility lookup and resource guides.	

TRAINING

Lovely Professional University (Skill Development) CERTIFICATE	Jan' 25 – Feb' 25
Fundamentals of Data Structures: Learn, Apply and Build Projects	
Mastered foundational and advanced data structures and their efficient application for complex data management. Applied core algorithmic techniques to solve problems and optimize code for time and space complexity. Developed and built practical projects to demonstrate hands-on competence in implementing data structures and algorithms in a high-level language.	

CERTIFICATES

ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM INFOSYS LINK	Nov' 25
Privacy and Security in Online Social -Media NPTEL LINK	Nov' 25
Introduction to Hardware and Operating Systems IBM LINK	May' 24
The Bits and Bytes of Computer Networking Google LINK	Mar' 24

ACHIEVEMENTS / EXTRA CURRICULAR ACTIVITIES

Solved 250+ coding problems across different platforms (Leetcode , HackerRank , GFG, etc.)	Feb' 26
Participated in North India's largest cybersecurity conference at LPU, engaging in technical sessions and industry workshops led by experts from CompTIA and Quick Heal.	Apr' 24

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology Computer Science and Engineering; CGPA: 7.35	Aug' 23 - Present
Bihar School Examination Board	Aurangabad, Bihar
Intermediate PCM; Percentage: 77%	Mar' 21 – May' 23
Vivekanand mission School	Aurangabad, Bihar
Matriculation Percentage: 68%	Mar' 20 – May' 21
